Adequate sleep is necessary for your child to be able to manage the stress and anxiety of every day life. Turn off computers, TV's, cell phones 30min prior to bed time and throughout the night. We will continue to follow your child regularly to monitor medication effectiveness and side effects. Please call us if any unacceptable side effects of the medications are noted or if symptoms appear to be worsening. Discontinue the medication and call immediately if your child voices any thoughts of harming himself. General healthy habits are important in controlling your child's symptoms.
