	Treatment goals should focus on keeping your child comfortable and hydrated. In order to do this, please foll the instructions listed below: Make sure your child is taking enough fluids- small amounts, often of Pedialyte or other clear liquids. Avoid j and other osmotic fluids. Once they are tolerating fluids, try giving bland diet. Advance diet as child is tolerating it. You may give your child acetaminophen or ibuprofen as needed for pain or fever. For dosing instructions, plearefer to our website. Monitor patient closely for signs of dehydration or worsening abdominal symptoms. Your child may return to school or daycare when he/she has no more fever or vomiting for 24 hours, stools at less than 3/day, and is feeling well enough to participate in regular activities. Please call our office if your child is not improving in 24 to 48 hours, has uncontrollable fever, increased vomit worsening abdominal pain, refusal to take fluids, not voiding every 6-8 hours, or other concerns. For more information regarding stomach viruses, please refer to our handout your provider may have given your	uices ase re iting,
	notes	*
	Diarrhea - Your child has been diagnosed with viral enteritis/diarrhea. Treatment goals should focus on keeping your child comfortable and hydrated. In order to do this, please foll the instructions listed below: Make sure your child is taking enough fluids- small amounts, often of Pedialyte or other clear liquids. Avoid j and other sugary fluids. Giving starchy solids like rice/carrots/bananas. Diarrhea recovery diet as discussed. Start a probiotic, for example florastor, bio gaia or culturelle, 1-2x/day while having diarrhea. You may give your child acetaminophen or ibuprofen as needed for pain or fever. For dosing instructions, please follows:	uices

pcc 01/13/2025 3:15PM Page 10 of 14

Please call our office if your child is not improving in 48 to 72 hours, has uncontrollable fever or worsening abdominal pain, bloody stools, more than 6 stools per day, refusal to take fluids, or you have any other concerns.

Your child may return to school or daycare when he/she has no more fever, stools are formed and less than 3/day,

and is feeling well enough to participate in regular activities.

1 01 1110	re information regarding stomach viruses, you provider may have given you a hand out.
