D2C Plan Allergies

Select All

Discussed common triggers for allergies

Discussed outdoor, indoor, food and other allergies

Discussed ways to reduce outdoor allergen exposure such as: understand the seasonal changes in pollen; follow pollen counts and avoid going out on high pollen count days; shower and change clothes after going out; avoid sitting in the grass; use a mask when cutting lawn or raking leaves

Discussed ways to reduce indoor allergen exposure such as: Use a HEPA air filter; use hypoallergenic bedding; wash sheets and blankets in hot water once a week; keep pet free zones; prevent mold, keep surfaces dry; clean hard surfaces and control cockroaches

Discussed atopic march and allergic triad of allergies, asthma and eczema

Discussed symptom relief with saline nasal rinses and also inhaled nasal steroid

Antihistamines block histamine the main chemical that leads to sneezing, runny nose and watery eyes

- Discussed benefits of using antihistamine in days when allergy symptoms are worse

notes

- Decongestants shrink blood vessels that are swollen due to allergies and relieve sinus pressure and congestion but never should be used on a frequent or regular basis as they can cause rebound congestion once the medication is stopped

notes

- Inhaled nasal steroids reduce inflammation by blocking the effects of many cellular chemicals released in the allergy pathway and work best when taken regularly

notes

- Follow up in 1-2 months for check-in on allergy symptoms

notes

- Follow up sooner for any lack of improvement or worsening in symptoms

notes

- Epinephrine autoinjector Rx discussed and reviewed in detail- sending Epinephrine autoinjector Rx to pharmacy and keep one at home and one at school

notes

- Allergy action plan reviewed

notes

- Discussed signs of severe allergy and anaphylaxis and gave an emergency plan for allergies printed to family and school

notes

- Discussed methods to test for allergies including blood IgE responses and skin allergen response testing

notes

- Will order immunocap IgE allergen response testing - order form completed and needs to return for discussion about results

notes

- Reviewed oral versus injection immunotherapy options and discussed that the allergist can assist with the best choices

notes

- Discussed benefits of immunotherapy and gradual desensitization of the immune responses that are overactive and how allergists can help with immunotherapy

notes

- Discussed benefits of skin allergen response testing with allergist as that is more accurate and definitive in understanding the body's allergy responses

notes

Referral to allergist/immunologist for further evaluation
