D2C Plan Cerumen Impaction

 Discussed protective aspects of cerumen (earwax) production by body

 Discussed variations in appearance and consistency of cerumen

 Advised not to use cotton swabs (Q-tips) in ears to clean as it can further impact ear wax and also hurt the ear drum

 Discussed benefits of using mineral oil or olive oil drops with dropper in external ear canal daily a few drops prior to bathing to allow ear wax to stay soft and not become too dry or impacted

 Discussed use of Debrox to soften the ear wax in the external auditory canal

 Explained cerumen impaction procedure and obtained consent for cerumen disimpaction procedure

 Used ear irrigation and lighted ear curette (Bionix) techniques to remove excess cerumen from external ear canals

notes

Follow up for lack of improvement

notes

Consider repeat hearing test in 2 weeks after cerumen removal
