D2C Plan Chest Pain

 Discussed common causes of chest pain

 Chest pain has a variety of sources, and virtually any structure in or around the chest can cause pain. This includes the lungs, the ribs, the chest wall muscles, the diaphragm, the joints between the ribs and breastbone, and the stomach

 Discussed costochondritis and causes and treatment in detail

 Discussed and gave printed handout on specific exercises to gently stretch the muscles of the rib cage

 May try gentle massage of the intercostal muscles and NSAIDS occasionally for muscle pain

 Discussed chest pain that worsens with activity and need for evaluation of the heart by a cardiologist

 Discussed causes of chest pain that are more concerning and need further evaluation

 Discussed positive family history of heart disease and need for examination by cardiologist due to chest pain

 Explained that referral to cardiologist is necessary to understand heart rhythm, blood flow and heart structure

 Follow up after cardiologist evaluation

 Advised to keep track of symptoms and notice if they occur more with activity or after eating

- Keep a symptom journal for the next week including foods, activities, nature, duration and frequency of symptoms
 ▼
- Follow up in 1-2 weeks after keeping a symptom log
 ▼
- Explained how acidic, spicy or greasy foods may be difficult to digest and may contribute to acid reflux and heartburn
 ▼
- Discussed the need for smaller more frequent meals to prevent stomach distention and reflux
 ▼
- Discussed blood pressure norms for age and height
 ▼
- Discussed ways to ensure adequate hydration and nutritional balance
 ▼
- Reduce intake of foods high in sodium- DASH diet handouts printed and given
 ▼
- Prescription for home blood pressure monitoring - preferably arm - brachial artery blood pressure monitor
 ▼
- Discussed shortness of breath and chest tightness and association with lungs
 ▼
- Trial of bronchodilator 15 minutes prior to exercise for exercise induced bronchospasm
 ▼
- add item
