## D2C Plan Croup List

**Select All**

Discussed common viral causes of croup such as parainfluenza virus

notes

Explained that running hot water to steam up bathroom, then turning water off and allow baby/child to breathe the humidified air will help

notes

Follow up in 1-2 days for repeat examination of airway and lungs

notes

Discussed signs and symptoms of respiratory distress and airway obstruction and when to call immediately or head to ER

notes

Follow up for any lack of improvement or worsening symptoms

notes

Reviewed likely viral pathogens and option of Viral PCR testing (Respiratory Panel) to assist with diagnosis and treatment

notes

Explained anatomy of airway and how swelling of the upper middle airway can lead to stridor and barking cough

notes

May give oral steroid short course to help with inflammation

notes

May use saline neb treatments to assist with airway humidification

notes

Discussed importance of supportive care, hydration and airway humidification

notes

Reassurance that symptoms will improve with supportive care
