**D2C Plan Gastroenteritis**

Select All

Discussed various causes of vomiting and diarrhea in children

- Discussed common viral, bacterial, parasitic and allergen induced causes of gastroenteritis in children

- Discussed food-borne illnesses associated with acute gastroenteritis

- Discussed signs and symptoms associated with dehydration

- Stressed importance of hydration and nutrients to help with gut recovery

- Instructed on appropriate methods of hydration including water, pedialyte electrolyte solution , coconut water and chicken and vegetable broth

- Advised to avoid sugary liquids like Gatorade, Powerade, Soda, Ginger ale as the sugar will lead to osmosis and a worsening of diarrhea and dehydration

- Discussed soft, bland foods in the recovery period: chicken noodle soup, plain white rice, veggie or chicken broth, toast

- Discussed if any increased fever, or mucus or blood in the stools to call the office

- Monitor hydration status and urine output

- Good handwashing and infection control in the household discussed

- Keep a food and symptom diary including Bristol stool chart to rate stool appearance for the next 2 weeks and return for a follow up visit

- Follow up immediately for any abdominal pain that worsens and does not improve

- Follow up for any lack of improvement or worsening symptoms

- Consider stool culture and stool for ova and parasite testing

notes

Discussed reasons for a referral to GI
